Midjourney Cats

Herb Weiner

About the Author

Photograph of a cat wearing jeans and a casual shirt and stylish glasses, standing on its hind legs, holding a book in its front paws as it browses the books in a library.

*The cat is **not** wearing jeans.*

Herb lives in Portland, Oregon with his wife Julienne and his two cats, Tux and Tulula. He is a retired software engineer, and has earned nine patents. He is creative and enjoys participating when the opportunity arises

He is the President, Newsletter editor, and Webmaster of the Cascade Stereoscopic Club (https://3dpdx.org). CSC conducts hybrid (Zoom and in-person) meetings on the fourth Monday evening of each month. Meetings are free and open to the public.

Herb is a member of the Production Team for the New York Stereoscopic Association (https://3dnysa.org). NYSA conducts weekly Zoom presentations in the spring and fall seasons.

He is on the Board of the 3D Division of the Photographic Society of America (PSA).

Herb is a Maker. He does embroidery, laser cutting and engraving, and 3D printing.

Herb is a retired Pyrotechnician. Prior to his retirement, he was the Lead Pyrotechnician for the July 4th fireworks shows in Long Beach Washington and Ilwaco Washington. As a licensed CDL HazMat driver, he continues to deliver the fireworks for these shows, and enjoys a front row seat for these displays.

Herb is a volunteer and trainer for the Portland Neighborhood Emergency Teams. He is a licensed amateur radio operator (AA7HW), trainer and W5YI Volunteer Examiner (https://aa7hw.org). He is also on the Board of W5YI Licensing Services (https://www.w5yi-vec.org).

Herb is the coauthor of Beyond Tacos: Mexican Cuisine. The new, revised edition (ISBN 978-0-937383-01-8, Copyright © 2025) is hosted by the Internet Archive and is available online as a free PDF: https://archive.org/details/BeyondTacos-MexicanCuisine.

You can reach Herb by email at herbw@wiskit.com, or connect with him on LinkedIn (https://www.linkedin.com/in/herbweiner).

Introduction

TLDR (Too Long; Didn't Read)

Feel free to skip the introduction and enjoy the images. Please come back and read the introduction later to answer any questions you may have.

Work in Progress, Updates, Requests, and Discussion

This book is a work in progress. Updates will be available periodically as new images and categories are added. To receive notification of new versions of this book, or to participate in discussions about this book, please sign up for the midjourneycats@groups.io list: https://groups.io/g/midjourneycats.

Requests are welcome. Please post your requests on the discussion forum above, or send your comments or requests to Herb Weiner <herbw@wiskit.com>.

Stereoscopic 3D

The first thing you are likely to notice is that each image in this book is composed of a pair of two nearly identical halves. These two halves correspond to left and right eye views, and enable stereoscopic (3D) viewing. If you are not interested in stereoscopic (3D) viewing, simply enjoy either the left or right half of each image pair. However, once you know how to view the images stereoscopically, they will pop out of the page in glorious 3D. Many people have experienced stereoscopic 3D at 3D movies, or with an old ViewMaster.

With practice, many people can freeview the stereoscopic images in this book using the parallel viewing method. Here is a good introduction: https://stereoscopy.blog/2022/03/11/learning-to-free-view-see-stereoscopic-images-with-the-naked-eye.

Some people have difficulty freeviewing, or prefer to use a stereoscopic viewer. My favorite viewer for viewing images in this book is the OWL Stereoscopic Viewer (no relationship to the Owl3D software), designed by Brian May, London Stereoscopic Company, https://shop.londonstereo.com/OWL-B-ENV.html. This viewer is also available from Berezin Stereo Photography Products: https://www.berezin.com/3d/owl_viewer.htm.

Perhaps you might be interested in *Diableries: The Complete Edition: Stereoscopic Adventures in Hell* (https://www.amazon.com/Diableries-Complete-Stereoscopic-Adventures-Hell/dp/1999667433). This book, by Brian May, Denis Pellerin, and Paula Fleming, includes an OWL Stereoscopic Viewer.

If you enjoy the stereoscopic 3D images in this book, you are invited to attend the meetings of the Cascade Stereoscopic Club (https://3dpdx.org). CSC conducts hybrid (Zoom and in-person) meetings at 7:00 PM Pacific Time on the fourth Monday evening of each month. Meetings are free and open to the public.

Midjourney

Midjourney (https://docs.midjourney.com) is AI (artificial intelligence) software that creates images in response to text-based input. Midjourney handles complex English language prompts. All generated images belong to the subscriber, and there are no restrictions on their use, including for commercial purposes. However, no explicit or offensive content is permitted.

Midjourney does not offer any free access; the least expensive plan is $10 per month or $96 per year. This is sufficient for approximately 200 unique prompts per month, with each prompt offering a selection of four different images.

Introduction

Midjourney (Continued)

Some people say that Midjourney is a bit like a slot machine. Often, none or only one of the four generated images is a winner. In many cases, Midjourney appears to ignore parts or all of a prompt. If you are unhappy with the results, try revising the prompt. The prompts for each image are shown below the image. In many cases, I have included comments in italics following the prompt.

Note that unless a specific numeric seed is specified as part of the prompt, Midjourney applies a random seed with 4 billion possibilities to each prompt. Thus, unless the seed is specified, if the same prompt is repeated, the resulting images will not be the same.

The images on the front and back cover have been generated with an aspect ratio of 17:22 (--ar 17:22), so that they fit perfectly on an 8.5 x 11 inch letter size page. The remaining images have been generated with an aspect ratio of 16:9 (--ar 16:9), optimized for viewing on my 3D TV.

All images generated prior to May 17, 2026 used the v7 model. All images generated on or after May 17, 2026 used the v8.1 model. The date for each image is shown in [square brackets] following the prompt below the image.

For a good basic introduction to Midjourney, visit https://www.youtube.com/watch?v=877HAXmKwwM. For a more in depth tutorial, I recommend Nolan Michaels' Beginner Course (https://ftpai.thinkific.com/courses/mjbeginner).

Stereoscopic (3D) Conversion

2D to stereoscopic (3D) conversion is the process of transforming the 2D images generated by Midjourney into stereoscopic (3D) images. Software is now available that automates this process and creates reasonably good (but not perfect) results. https://en.wikipedia.org/wiki/2D_to_3D_conversion provides a good introduction to the conversion process.

In general, the first step in the conversion process is to create a depth map that encodes the distance of each element of the image from the viewer, with black representing the most distant elements of the image, and white representing the closest elements of the image. The depth map is then used to increase the disparity (difference between the left and right images) for near objects, while preserving low disparity for distant objects. Distant elements that are partially obscured by near objects may need to be synthesized if they should be visible to only one eye but are not present in the original image.

Depth Anything v2 is currently one of the best depth estimation models. It is currently used by Owl3D, the software used for the 2D to stereoscopic (3D) conversion of the images in this book. For a comparison of popular depth estimation models, please refer to https://blog.roboflow.com/depth-estimation-models.

Obviously, errors in the generated depth map will result in conversion errors. Ideally, the depth map should be edited to correct these errors prior to using the depth map to generate left and right eye views. On December 6, 2025, Harold Baize (aka Silverman) was featured on NYSA Presents (https://3dnysa.org/show/show-20251206). A video of the show is available at https://www.youtube.com/watch?v=AX-WkYJfSzCc.

Harold discussed the five common errors in the depth maps produced by current conversion software algorithms, including Depth Anything v2:

Stereoscopic (3D) Conversion(Continued)

- Small objects (e.g. bubbles, drops of water, insects) are not depth mapped at all. They are placed at the depth of whatever is behind them.
- Long thin things (poles, antennas, stems, branches, guitar necks, hair, sometimes arms and legs) are bent toward the background.
- Some parts of objects (possibly because of a difference in color or brightness) are not included with the primary object, and therefore appear at different (incorrect) depth.
- The closest object (the primary focus of the composition of the image) is often placed too close (much closer than it should be) to the observer. As a result, objects that are in front of the closest object are not given enough space (depth) in the composition.
- The nature of a depth map is that every point in the image is assigned a single depth (distance from the observer). Thus, a depth map can not represent variable transparency; for example smoke from a cigarette.

Later in the presentation, Harold discussed an additional (sixth) problem with the depth maps produced by current conversion software algorithms:

- The generated depth maps generally do not accurately reflect the stereoscopic depth of reflections (e.g. in a mirror or a pool of water) or objects viewed through transparent surfaces (e.g. through glass windows). The depth map often indicates the depth of the transparent or reflective surface itself, rather than the object that the observer sees. Depth estimation models are often used by self driving cars and similar applications, and in order to avoid collisions, these applications need to know the location of the window or mirror rather than the location of the object seen through or reflected by the window or mirror.

Harold spent a considerable amount of time manually correcting the depth maps of the stereoscopic (3D) conversions that he showed on NYSA Presents. I have neither the time nor the skill to make these corrections, so the stereoscopic (3D) conversions shown in this book have not had any manual corrections applied.

Owl3D

Owl3D (https://www.owl3d.com) is software that converts images (such as those generated by Midjourney) or videos to stereoscopic 3D. Owl3D offers a free starter plan, but this plan offers limited resolution for conversion of photos, and limited duration for conversion of movies. The Plus plan ($9.99 / month or $83.88 /year) supports up to 4k (3840 x 2160) resolution. The Plus plan is not licensed for commercial use; commercial use requires the more expensive Pro plan ($300 per year). Owl3D runs on Windows and on M1 or newer Macs. Owl3D, which runs on the customer's computer rather than in the cloud, imposes no limits on the number of photos or minutes of video converted.

Here are the Owl3D settings I use for stereoscopic 3D conversion:

- 3D Strength: 5.5 (Midway between 1 and 10).
- Render Style: 0 (Midway between Realistic and Cinematic).
- Auto Convergence: 0 (Visual Comfort, midway between Sink In and Pop Out).
- Render for: Right Eye.
- Depth Method: Standard.
- AI Model: Balanced V2

Introduction

Photorealistic Images

The backgrounds of many of the images in this book are not in focus, even when the prompts specify that "the entire photograph is in focus." In some photography, bokeh (in which portions of the photograph are deliberately not in focus) is considered an artistic attribute. However, bokeh makes it more difficult to convert the photograph to stereoscopic 3D, and I struggled to minimize or eliminate bokeh from the images in this book.

Thank you to Ken Kovar, who used Gemini AI (Thinking with 3 Pro) to produce the following recommendations:

> Creating a single, perfectly composed 2D image is the most reliable workflow for generating high-quality stereoscopic 3D.
>
> Software like Owl3D relies on generating an accurate "depth map" from your image. To get the best possible depth map, you need to "trick" the AI into seeing clear distance.
>
> Here are the key criteria for a perfect source image, which I've built into the prompt below:
>
> 1. Infinite Focus (Deep Depth of Field): This is the most critical rule. Bokeh (background blur) confuses depth map generators, causing them to interpret blurry distant objects as flat walls close to the camera. Everything from the blades of grass at your feet to the mountains on the horizon must be tack-sharp.
> 2. Strong Layering (Parallax Potential): You need distinct elements in the foreground, middle ground, and background. This creates the parallax effect where closer objects appear to move more than distant ones, which is the essence of 3D.
> 3. High Texture & Detail: Smooth, featureless surfaces (like a clear blue sky or a blank wall) are hard for AI to assign depth to. Surfaces with rich texture (rock, bark, ripples, foliage) give the software more data points to calculate distance accurately.
> 4. Consistent Lighting: Avoid overly dramatic, high-contrast lighting that creates pure black shadows, as depth information can be lost in the darkness. Natural, even daylight is best.
>
> **The "Depth-Optimized" Midjourney Prompt**
>
> Here is a prompt designed to create a photorealistic landscape that meets all these criteria.
>
> > A photorealistic landscape photograph designed for 3D conversion. Foreground: Highly detailed moss-covered rocks, ferns, river pebbles, and gnarled roots right in front of the lens. Midground: A winding river with rapids, an old stone arched bridge, and a rustic timber cottage. Background: Rolling forested hills leading to distant, craggy mountain peaks under a partly cloudy sky. Natural golden hour light enhancing texture. The entire scene from extreme foreground to far horizon is in ultra-sharp focus with a deep depth of field. f/22 aperture, hyperfocal distance, no bokeh, infinite focus, incredibly high texture detail, 8k resolution photography --ar 21:9 --v 6.0 --style raw
>
> **Why this Prompt Works**
>
> - A photorealistic landscape photograph...: Sets the overall style and goal.
> - Foreground: ... Midground: ... Background: ...: Explicitly forces Midjourney to compose the scene with distinct layers, guaranteeing the depth needed for a good 3D effect.
> - ultra-sharp focus with a deep depth of field: The primary instruction to keep everything clear.

Photorealistic Images (Continued)

- **f/22 aperture, hyperfocal distance, no bokeh, infinite focus:** These are photographic terms that reinforce the command to eliminate blur. f/22 is a very small aperture used for maximum depth of field. Hyperfocal distance is a technique to keep everything from half that distance to infinity in focus. No bokeh is a direct negative constraint.
- **enhancing texture, incredibly high texture detail:** Ensures surfaces aren't smooth, giving the 3D software more information to work with.
- **--ar 21:9:** A wide cinematic aspect ratio often works best for immersive landscapes, giving a greater sense of scale. [Note that the images in this book use --ar 16:9 rather than --ar 21:9.]
- **--style raw:** This parameter tends to produce less "opinionated" or artistic images and more photographic, literal interpretations of the prompt, which is perfect for this technical requirement.

Please refer to https://gemini.google.com/share/7a0774c279bc for Ken's complete interaction with Gemini AI.

It is not possible to redo the existing images using this technique, since even minor changes to the prompt would cause Midjourney to generate a completely new image. And I must admit that I don't usually know precisely what I am looking for when I craft a prompt. It is more fun to be surprised. I typically add detail to the prompt only when I am unhappy with the initial results.

However, I have used the above recommendations for some of the images in the book. Please check the index for "Photorealistic Images" to find them. Note that in each case, I used the following prompt, varying only the Foreground, Midground, and Background portions of the prompt.

> A photorealistic landscape photograph designed for 3D conversion. *Foreground: .... Midground: .... Background: ....* Natural golden hour light enhancing texture. The entire scene from extreme foreground to far horizon is in ultra-sharp focus with a deep depth of field. f/22 aperture, hyperfocal distance, no bokeh, infinite focus, incredibly high texture detail, 8k resolution photography --ar 16:9 --v 6.0 --style raw

Below each such image, I specify only the Foreground, Midground, and Background portions of the prompt, and also include a comment referring to this (the Photorealistic Images) section in the Introduction.

Midjourney Cats Calendar

A Midjourney Cats Calendar features twelve of the images from this book. For more information about the Calendar, please refer to https://midjourneycats.com/calendar.html.

Introduction

Ethics and Legality of AI Image Generation

On June 23, 2025, Judge William Alsup (United States District Court, Northern District of California) ruled that training Large Language Models (AI) on copyrighted books constitues fair use (https://www.govinfo.gov/content/pkg/USCOURTS-cand-3_24-cv-05417/pdf/USCOURTS-cand-3_24-cv-05417-0.pdf).

The judge wrote that the authors' lawsuit is "no different than it would be if they complained that training schoolchildren to write well would result in an explosion of competing works."

I am not a lawyer, but if this decision is not overturned on appeal, I believe it could serve as a precedent that training Midjourney and similar tools using art and photos is also fair use. In other words, if it is fair use to train humans using this material, it is also fair to train AI using this same material. If either a human or AI copies an individual photograph or piece of art, that would be copyright infringement; but if there are no identifiable elements that were copied in producing a piece of computer generated artwork, there would not be sufficient grounds to allege copyright infringement.

Creative Pro members may be interested in "The Designer's Guide to AI & Copyright," Kathryn Goldman, June 2025, https://creativepro.com/the-designers-guide-to-ai-and-copyright. This 8 page article covers copyright, fair use, training data, licensing, indemnity, risk management, various AI tools including Midjourney, and other topics.

Raspberry Chocolate Chip Cookies

Midjourney has not been trained on "Raspberry Chocolate Chip Cookies," but all references to "Chocolate Chip Cookies" in this book should be interpreted to mean "Raspberry Chocolate Chip Cookies." Here is the recipe.

You can purchase unsweetened freeze-dried raspberries in select stores or online, or you freeze-dry them yourself, for example using a Harvest Right Freeze Dryer (https://harvestright.com).

This recipe is based upon the Nestlé Toll House Recipe.

1	cup	butter	Beat until creamy.
¾	cup	sugar	
¾	cup	brown sugar	
1	tsp	vanilla extract	
2		eggs	Add to mixture and beat well.
2¼	cups	flour	Gradually beat into mixture.
1	tsp	salt	
1	tsp	baking soda	
1–2	cups	semisweet or dark chocolate chips	Mix into cookie dough. Scoop onto ungreased baking sheet.
1	cup	freeze-dried raspberries	

Preheat oven to 375˚F. Bake cookies for 9 – 11 minutes, until golden brown.

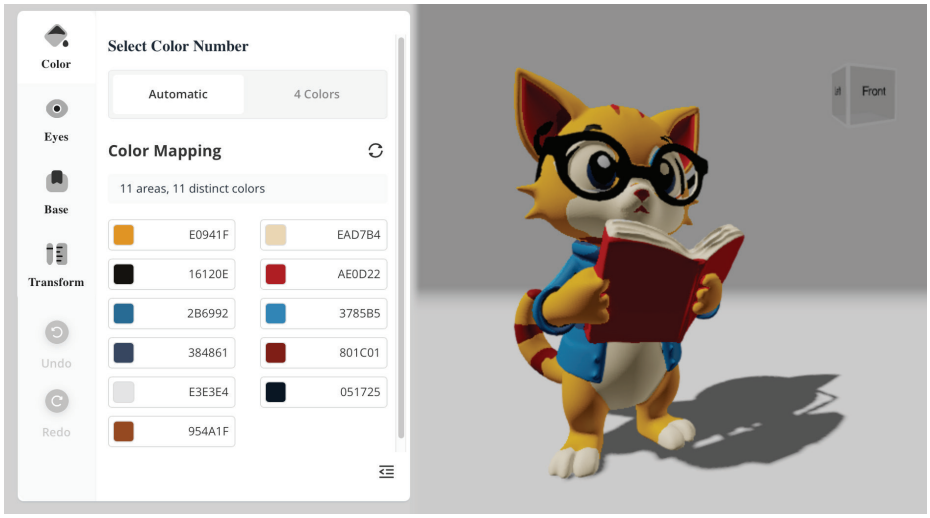

Mascot

Bambu Lab Printmon Maker (https://makerworld.com/en/makerlab/printMonMaker) uses AI to convert an uploaded photo to a printable 3D model. I uploaded the front cover of *Midjourney Cats*, and Printmon Maker produced the Midjourney Cat mascot shown to the right.

Midjourney Cat mascot generated by Bambu Lab Printmon Maker.

The resulting model required 11 filament colors. I opened the model in Bambu Studio (the software used to convert 3D models into the printable format required by Bambu 3D printers), and was able to reduce the number of colors to six (black, beige, red, blue, orange, and brown) by combining similar colors.

Generated Model on MakerWorld

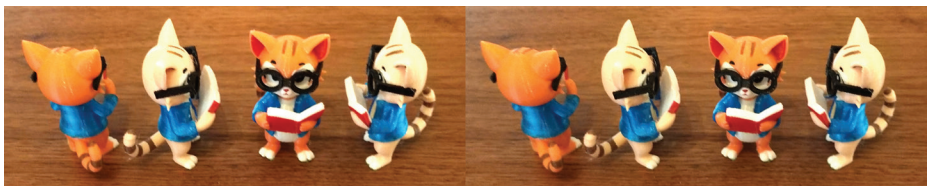

I printed this model on a Bambu Lab X1E printer with two AMS (Automatic Material System) units, supporting a maximum of eight different filaments (six colors plus support).

My first print attempt was largely successful, except that the eye glasses failed to print. The problem was that the frame of the glasses was too thin. The minimum feature size for traditional 3D printing is 2.0 mm (reference: *The 3D Printing Handbook*, by Ben Redwood, Filemon Schöffer, and Brian Garret © 2017, ISBN 978-90-827485-0-5, page 225, Design Rules Summary Table). The frame of the glasses was well under 1.0 mm.

Editing the model to increase the thickness of the eye glasses was a bit of a challenge. Bambu Studio includes Mesh Boolean operations that I hoped would allow me to remove the existing glasses from the model, but applying any Mesh Boolean operations removed all color information from the model.

Bambu Studio does allow merging of multiple models, so I used OpenSCAD to design eye glasses with a thicker frame, and then merged the eye glasses with the existing model. This required precise design to allow the new eye glasses to completely overlap the existing eye glasses, so that portions of the old frame did not protrude from the new frame. The OpenSCAD eye glasses are available for download from Thingiverse: https://www.thingiverse.com/thing:7140889.

Introduction

Photograph showing four 3D Printed Midjourney Cat mascots. The mascots are almost three inches tall. These were printed using a Bambu Lab X1E 3D Printer with two AMS (Automatic Material System) units attached, to enable printing models with up to eight colors. Note that the lighter colored mascot was printed using Peach Tan filament in place of Orange.

Photograph showing the same four Midjourney Cats mascots posed next to a printed copy of the Midjourney Cats book, to better show the size of the mascots.

Photograph showing five 3D Printed Midjourney Cat mascots printed using only four colors (beige has been substituted for the brown stripes, and red has been substituted for the blue jackets).

Mascot (Continued)

The initial model also had some errors in the colors. For example, the chest of the cat was not completely white; it had patches of red, blue, and black. I was able to use the painting tools to correct these.

The Midjourney Cat Mascot is available for download from MakerWorld: https://makerworld.com/en/models/1780692-midjourney-cat-mascot#profileId-1896802.

Note that if your want to 3D print this mascot and have only a single AMS, you might consider changing the blue jacket to red, and the brown stripes to white (or beige), so that the mascot can be printed using only black, white (or beige), red, and orange, as shown in the bottom photograph on this page.

One user has successfully downloaded the model from MakerWorld and printed these mascots on an Anycubic Kobra S1 printer.

Books

Here are some of my favorite books featuring cats. How many of these have you seen?

- *Cats' Eyes*, Anthony Taber, 1978, ISBN 0-525-07814-2.
- *Night Cats*, Anthony Taber, 1983, ISBN 0-312-92571-9.
- *Why Cats Paint: A theory of feline aesthetics*, Heather Busch and Burton Silver, 1994, ISBN 0-89815-612-2.
- *Louis Wain's Cats*, Chris Beetles, 2011, ISBN 978-1-83885-470-6.
- *The Cat Whisperer: Why Cats Do What They Do – and How to Get Them to Do What You Want*, Mieshelle Nagelschneider, 2013, ISBN 978-0-553-80785-1.

Introduction

Challenge Coin

At a recent fireworks show, the crew was discussing the possibility of creating a Challenge Coin. I offered to design a cat-themed Challenge Coin using Midjourney.

To the right is the Pyro Cat that is featured on the Challenge Coin.

Below are the two sides of the finished Pyro Cats Challenge Coin, produced by Wholesale Challenge Coins (https://www.wholesale-challengecoins.com). Our Pyro Cats challenge coins are **not** for sale, but if you would like one, and have an interesting challenge coin to offer as a trade, please contact me at Herb Weiner <herbw@wiskit.com>.

Copyright

US Copyright law specifies that material generated by AI is **not** copyrightable. For more information on US Copyright law and AI, please refer to https://www.copyright.gov/ai.

I devote substantial effort to compose the prompts, provide introductory text and explanatory comments, organize the content, and generate a complete table of contents, index, and glossary. All of this human generated work is copyrighted, and the copyright has been registered: https://api.publicrecords.copyright.gov/search_service_external/copyrights/pdf?copyright_number=TX0009601866.

A cat is standing upright on its hind legs outdoors on a large nicely mowed field, wearing fireman's turnouts, a helmet, and goggles. The cat is holding an American flag in its left paw. Its right paw is holding a short thick red stick pointed to the right with a red flame shooting out of the end.

Midjourney did not understand "road flare" so I requested "red stick."

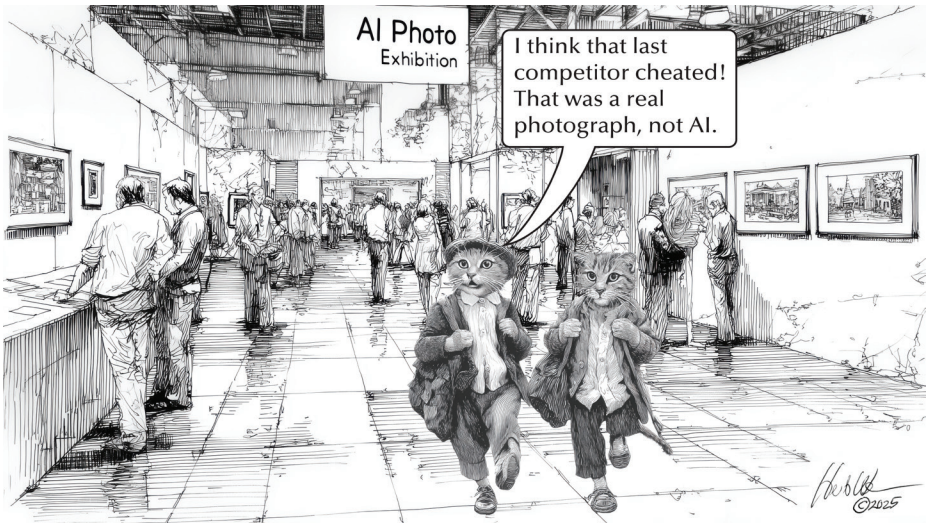

Introduction

Herb with Spot the Robot Dog at Loupe (https://loupe.team) in Portland, Oregon, Wednesday, September 25, 2024.

Pen and ink drawing looking into an exhibit hall hosting a photo exhibition. There is a sign "AI Photo Exhibition" hanging from the ceiling.

Pen and Ink drawing of two cats, standing on their hind legs, dressed in casual clothes, leaving an exhibition. The cat on the left has his mouth open because he is saying something.

Spot the Robot Dog

I first "met" Spot the Robot Dog from Boston Dynamics (https://bostondynamics.com/products/spot) at a Digital Fabrication Meetup (https://www.meetup.com/pdx-digital-fabrication-meetup) in Portland, Oregon on Wednesday, September 25, 2024.

Spot has subsequently been featured on America's Got Talent: https://www.youtube.com/watch?v=ptYDWP9uTis and https://www.youtube.com/watch?v=o_iUqGxRRAE.

If you browse through this book, you will find that the Midjourney Cats have now also met Spot.

Midjourney Cats Cartoon

It is generally a violation of the conditions of entry to enter AI generated content in a photographic exhibition. With advances in AI, some photographers are concerned that it may in the future be difficult for judges to identify photographers that enter AI generated content in violation of the conditions of entry.

The cartoon to the left imagines a competitor who enters a real photograph in an exhibition restricted to AI generated photographs. It is a composite of two pen and ink drawings that were generated by Midjourney using the two prompts shown below the cartoon.

Cat peeking out of a box. *[May 26, 2025]*

Cat trying to catch a goldfish. *[May 13, 2025]*

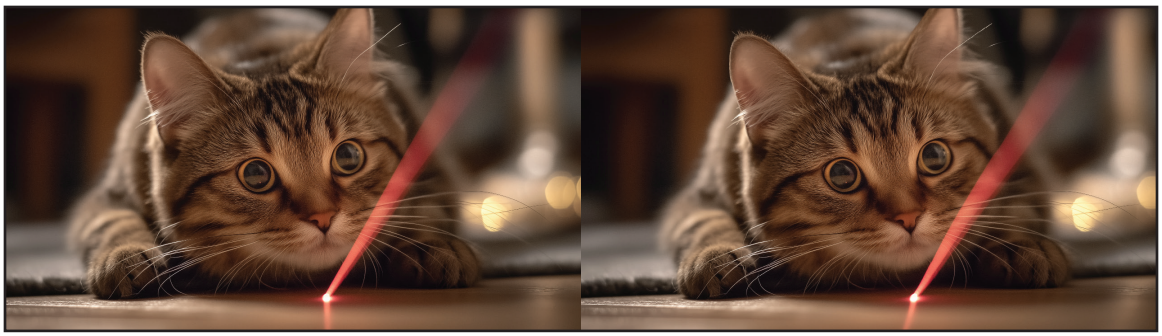

Color photograph of a cat with two pet mice. *[July 16, 2025]*

at Home

A balloon with a long string is floating in the living room. A cat is is pulling on the string. *[May 13, 2025]*

The "is is" typo that appears in the above prompt does not appear to have affected the result.

Cat chasing a laser pointer. *[May 12, 2025]*

The beam of a real laser pointer would be linear; the upper area would not be diffused.

Cat climbing a cat tower. *[May 20, 2025]*

This cat is not climbing a tower; the cat is either reaching or jumping off of the tower.

Cat playing with a catnip mouse. *[July 22, 2025]*

Cat walking across a tight rope. *[May 26, 2025]*

Cat balancing on a basketball. *[July 18, 2025]*

at Home

Color photograph of a cat is standing on its hind legs in front of a mirrow wearing a classy suit. The cat is admiring his reflection in the mirror. *[October 9, 2025]*

Color photograph of a cat standing on its hind legs looking through the refrigerator for something good to eat. *[October 9, 2025]*

Color Photograph of a Cat standing on its hind legs dressed in work clothes, holding a framed photograph in its front paws preparing to hang it on the wall. *[October 9, 2025]*

at Home

Color photograph of a boy cat and a girl cat, dressed in casual clothing, sitting next to each other holding hands on a couch with their feet on the floor, watching television. *[October 26, 2025]*

Color photograph of cat standing on its hind legs trying to catch the cuckoo on a cuckoo clock. There is a lot of detail in the cuckoo. *[November 3, 2025]*

Color photograph of a cat standing on its hind legs peeking over the top of a desk stalking a computer mouse. *[November 1, 2025]*

at Home

Color photograph showing a grand piano in an elegant living room. Two large cats are sitting on the piano bench facing the piano with their feet hanging down, playing a duet on the piano. *[November 18, 2025]*

Color photograph of two cats sitting on a porch swing admiring the beautiful weather. *[November 18, 2025]*

Realistic looking color photograph of a cat standing on its hind legs with one paw holding the front door open and the other paw pointing out the door towards the street in front of the house. The cat has a stern look on his face. Three mice are walking out the door. Each mouse is holding a tiny suitcase. *[November 3, 2025]*

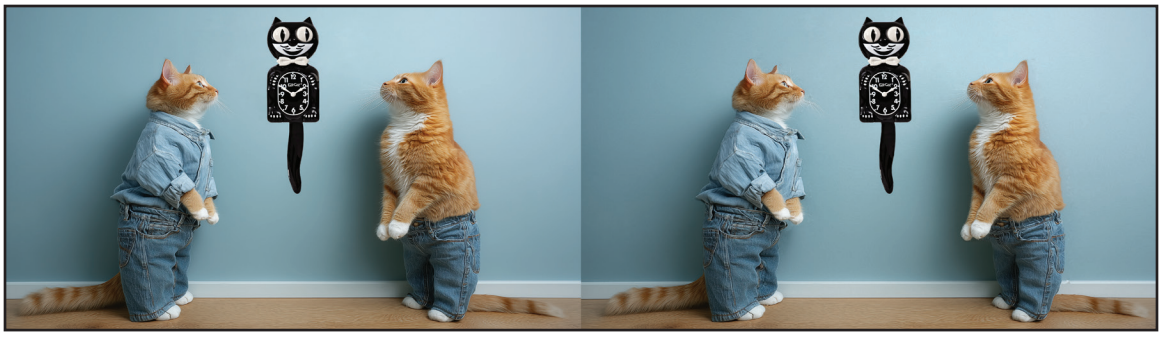

Color photograph of a cat standing on its hind legs in a kitchen. The cat is taking a bite of a large chocolate chip cookie that it is holding in its front paw. *[December 16, 2025]*

Find the recipe for these scrumptious Raspberry Chocolate Chip Cookies in the Introduction.

Color photograph of a huge cup of hot cocoa topped with whipped cream in front of a fireplace. A cat is sitting in the cup soaking in the hot chocolate with his arms on the rim, like in a hot tub. *[December 16, 2025]*

Color photograph of two cats dressed in jeans and T-shirts standing on their hind legs looking at a clock on a pale blue wall. *[December 17, 2025]*

Midjourney has not been trained on Kit-Cat Klock (https://kit-cat.com) so I had to manually replace the clock on the wall.

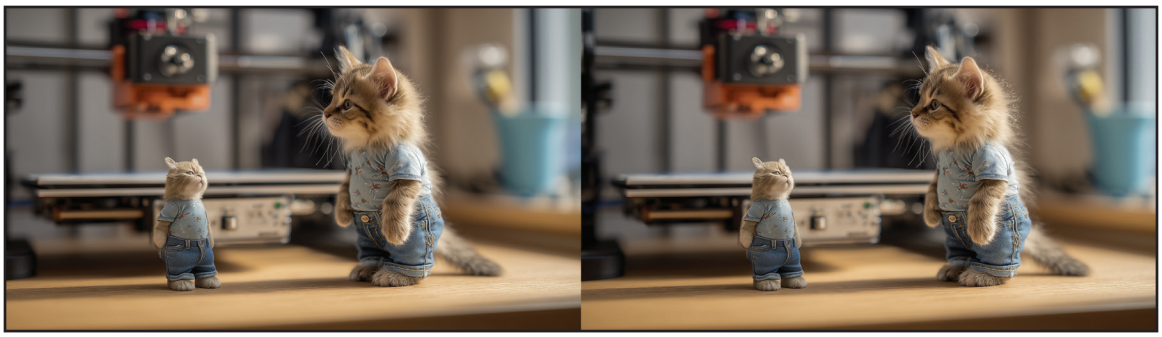

at Home

Color photograph of two cats sitting upright in chairs at a table working on a jigsaw puzzle. *[January 5, 2026]*

Color photograph of a cat examining a globe with is paw on the United States. *[January 9, 2026]*

Color photograph of a cat dressed in jeans and a T-shirt standing on its hind legs admiring a 3D printed model of itself. A 3D printer is in the background. *[January 9, 2026]*

at Home

Color photograph of a family of cats at home eating dinner. *[May 21, 2026]*

Color photograph of a family of cats at home watching TV. *[May 21, 2026]*

Color photograph of a family of cats in their home enjoying game night. *[May 22, 2026]*

at Home

Color photograph of a family of cats in their back yard enjoying a barbeque. *[May 22, 2026]*

Color photograph of a family of cats at home doing yardwork and gardening. *[May 22, 2026]*

Color photograph of a family of cats in their cozy home looking out their front window on a wet miserable rainy day. *[May 23, 2026]*

in the Garden

Photograph of cat meditating in a Japanese Garden. *[July 22, 2025]*

Photograph of a cat looking at its reflection in a pool at a Japanese garden. *[July 22, 2025]*

Photograph of a cat carrying an umbrella during a rainstorm in a Japanese Garden. *[July 22, 2025]*

in the Garden

Photograph of a cat riding in a canoe down a stream in a Japanese garden. *[July 22, 2025]*

Tuxedo cat chasing a catnip ball. *[May 12, 2025]*

A cat in a gardeners uniform, holding a shovel and a rake, tending a garden. *[June 22, 2025]*

in the Garden

Color photograph of a cat standing on its hind legs, dressed as a gardener, tending a huge catnip crop. *[August 14, 2025]*

Color photograph of a cat standing on its hind legs, dressed as a gardener, using a hose to water a huge catnip crop. *[August 14, 2025]*

Color photograph of a cat standing on its hind legs, tending a farm stand, selling catnip to other cats. *[August 14, 2025]*

in the Garden

Color photograph of a cat standing on its hind legs, dressed as a gardener, admiring a large pussy willow in the garden. *[August 16, 2025]*

Color photograph of a cat standing on its hind legs, dressed as a gardener, admiring a large money bush sprouting with $5.00 bills with a garden in the background. *[August 16, 2025]*

Color photograph of a cat wearing jeans and a western shirt and a straw hat, standing on its hind legs on a ladder picking apples from an apple tree. *[August 20, 2025]*

in the Garden

Color photograph of a scarecrow in a garden. A cat is standing on its hind legs next to the scarecrow, dressed as a farmer, adjusting the hat on the scarecrow. *[August 20, 2025]*

Color photograph of a cat standing in a grrden on its hind legs, with a big butterfly that has landed on its front paw. *[August 18, 2025]*

Garden is misspelled in the prompt.

Color photograph of a cat dressed in stylish clothes, standing on its hind leges, admiring a cactus garden. *[August 21, 2025]*

Out and About

Two cats enjoying a ride in a hot air balloon flying over Portland Oregon. *[May 13, 2025]*

A cat with big eyes carrying a pan of lasagna. *[July 18, 2025]*

The cat is not carrying the pan; the cat is reaching for the pan on a table.

Two cats sitting in a miniature red sports car racing around a brightly lit living room. *[May 13, 2025]*

This wonderful image was the result of specifying chaos 25 (on a 0 – 100 scale) to get a very different image.

Out and About

A cat dressed up as a wizard holding a magic wand with birds flying around him. *[May 19, 2025]*

A cat is standing at a pool table on its hind legs, wearing blue jeans and a casual shirt. The cat is holding a cue stick and aiming a shot. *[July 16, 2025]*

Color photograph of cat sitting upright in a chair, with its front paws on a table, playing chess against an attractive woman in a brightly lit dining room. *[July 18, 2025]*

The inadvertently placed period after "woman" does not appear to have affected the result.

Out and About

Cat riding a rooba. *[July 22, 2025]*

I had intended to prompt for "cat riding a roomba." Rather than indicate that it doesn't understand, AI sometimes responds with hallucinations (nonsensical, false, or misleading responses). But what a wonderful image.

Cat riding an automatic vacuum cleaner. *[July 22, 2025]*

When you don't get what you want, change the prompt.

A cat attacking a water balloon. *[July 22, 2025]*

Out and About

Cat rubbing a magic lamp. *[July 18, 2025]*

Two cats dancing with each other. *[July 22, 2025]*

Two cats playing with a catnip mouse. *[July 22, 2025]*

Out and About

Color photograph of two tall male cats standing on their hind legs dressed as missionaries walking through a suburban neighborhood carrying bibles working to preach the gospel to residents. *[August 16, 2025]*

Color photograph of a cat standing on its hind legs, dressed as a mommy, pushing a baby carriage down a suburban sidewalk with houses in the background. There are three cute kittens in the baby carriage. *[August 16, 2025]*

Color photograph of a cat standing on its hind legs, wearing shorts and a T-shirt and a baseball cap on backwards, riding a skateboard down a suburban sidewalk with houses in the background. *[August 16, 2025]*

Out and About

Color photograph of a cat standing on its hind legs wearing a sandwich sign advertising a new pizza shop. The Pizza shop is in the background. *[August 20, 2025]*

Color photograph of a cat showing off his new catsuit. *[September 1, 2026]*

Color photograph of a cat standing on its hind legs holding a glass of red wine and socializing with other cats and people at a party. *[August 18, 2025]*

Out and About

Color photograph of a girl cat and a boy cat standing on their hind legs outdoors in a field. It is a dark night and they are dressed for cool weather, and are admiring a spectacular Aurora Borealis. *[September 25, 2025]*

Color photograph of a cat standing on its hind legs wearing casual pants, a jacket and tie, standing in a fancy art gallery admiring the artwork. *[September 25, 2025]*

Color photograph of a cat standing on its hind legs wearing casual pants, a jacket and tie, standing in a fancy art gallery admiring the artwork. *[September 25, 2025]*

Out and About

Color photograph of a cat standing on its hind legs, dressed in casual attire, shopping in a camera store. The cat is admiring the fancy cameras that the clerk is showing him. *[September 25, 2025]*

Color photograph of a cat standing on its hind legs wearing boots, standing in the water at the edge of a stream holding a fishing pole and fly fishing. Other fly fishermen are in the background. *[September 25, 2025]*

Color photograph of a boy cat and a girl cat, upright sitting at a table in an ice cream shop. The cats have their feet on the floor. They are wearing casual clothes. They are sharing an ice cream soda with two straws. Each cat is drinking from one of the two straws that are in the one ice cream soda that they are sharing. *[October 9, 2025]*

Out and About

Color photograph of a cat dressed as Sherlock Holmes holding a magnifying glass looking for clues to solve a mystery. *[January 9, 2026]*

Color photograph of a cat dressed as a detective investigating a mystery. *[March 8, 2026]*

Color photograph of a cat dressed as a detective investigating a mystery. *[March 8, 2026]*

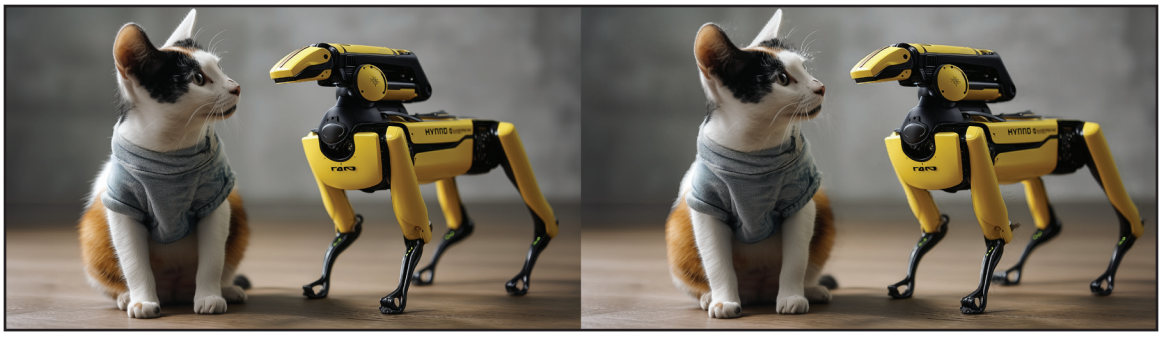

Out and About

Color photograph of a cat searching for the missing hour from spring forward. *[March 8, 2026]*

Color photograph of tall cat standing on its hind legs dressed in Goth Clothes. Cat is talking to Goth lady. *[October 9, 2025]*

Color photograph of a cat standing on its hind legs dressed in jeans and a t-shirt. Standing next to him is Spot the Robot Dog from Boston Dynamics. *[September 25, 2025]*

This prompt required an Omni Reference for Spot the Robot Dog.

Out and About

Color photograph of a cat sitting on a crescent moon looking down at earth. *[November 1, 2025]*

Color photograph of a cat outside at night reaching up to catch a bright star. *[November 1, 2025]*

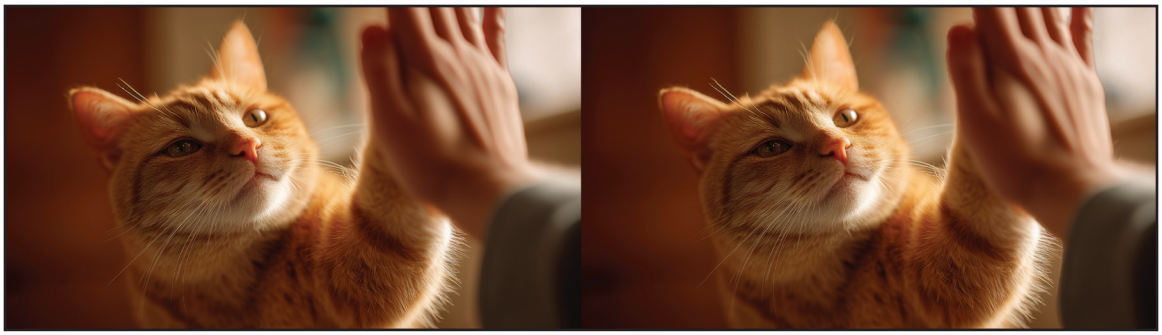

Color photograph of a cat sitting in a movie theater wearing 3d glasses. The frames are black, the right lens is blue, and the left lens is red. There are people on both sides of the cat, all wearing the same kind of glasses. *[November 1, 2025]*

Out and About

Color photograph of a good cat and a bad cat hanging out together. *[November 14, 2025]*

Color photograph of cat giving a high five to his person. *[February 22, 2026]*

Color photograph of cat giving a high five to his person. *[February 22, 2026]*

Out and About

Color photograph of a cat riding a magic carpet. *[November 14, 2025]*

Color photograph of cats participating in a Zoom meeting. *[February 22, 2026]*

Color photograph of cats participating in a Zoom meeting. *[February 22, 2026]*

Out and About

Color photograph of two cats riding in an Uber. *[November 18, 2025]*

Photograph of cat flying Snoopy's airplane. *[December 6, 2025]*

Photograph of cat flying Snoopy's airplane. *[December 6, 2025]*

Out and About

Photograph of cat flying Snoopy's airplane. *[December 6, 2025]*

Color photograph cats sitting at a table playing poker. *[December 17, 2025]*

Color photograph of a cat playing Blackjack. *[February 18, 2026]*

Out and About

Color photograph of four cats sitting upright in chairs around a square table playing monopoly. One cat is rolling the dice. One cat is counting his money. *[December 17, 2025]*

This game doesn't look like Monopoly.

Color photograph of Cats in the City. *[February 22, 2026]*

Color photograph of Cats in the City. *[February 22, 2026]*

Out and About

Color photograph of Cool cat, summer in the city, looking for a kitty. *[March 1, 2026]*

Color photograph of Cool cat, summer in the city, looking for a kitty. *[March 1, 2026]*

Color photograph of Cool cat, summer in the city, looking for a kitty. *[March 1, 2026]*

Out and About

Color photograph of cats playing musical chairs. *[December 17, 2025]*

Color photograph of cat standing on its hind legs looking at a sundial. The shadow casting pointer on the sundial casts a shadow on the round dial plate indicating the current time. *[January 10, 2026]*

Color photograph of of a cat standing on its hind legs, holding a remote control in its front paws to to fly a remote controlled drone to explore the neighborhood. *[January 9, 2026]*

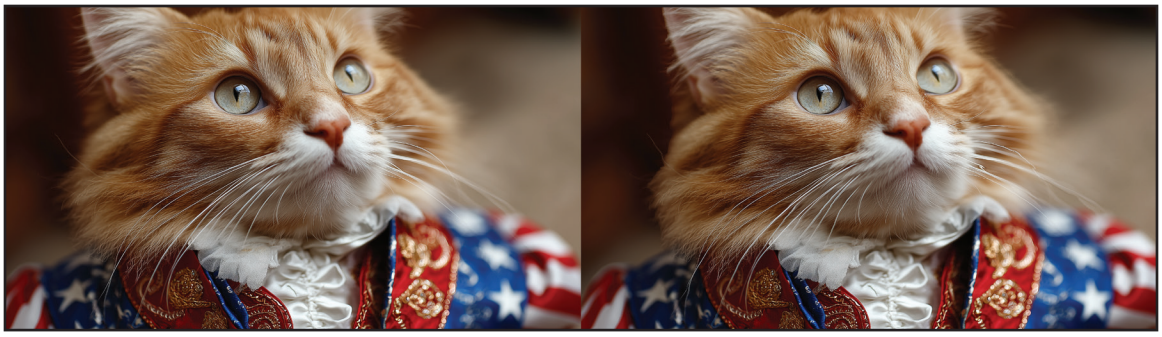

Out and About

Color photograph of a cat wearing jeans and a casual shirt standing upright on its hind legs riding a Segway on a trail through a park. *[January 9, 2026]*

Color photograph of a cat dressed as a president to celebrate President's Day. *[February 18, 2026]*

Color photograph of a cat dressed as a president to celebrate President's Day. *[February 18, 2026]*

The stereoscopic (3D) conversion of this image is less than optimal because part of the cat's face is not in focus.

Out and About

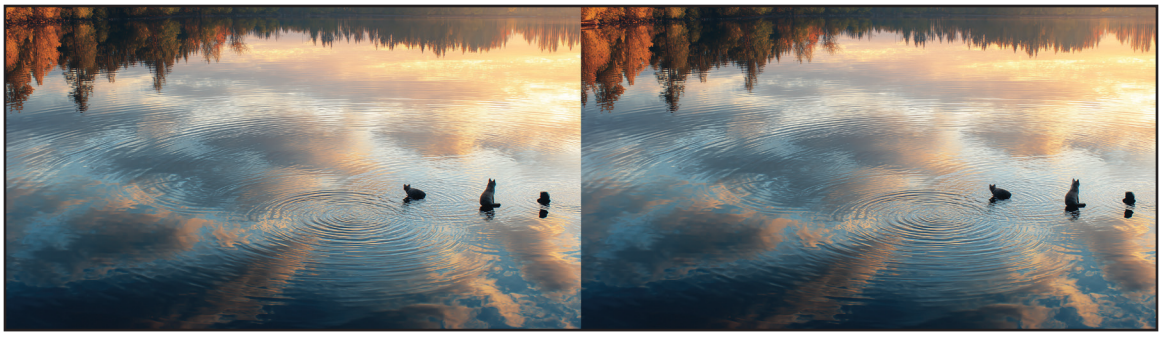

Color photograph of two cats creating patterns on a calm lake by skipping stones.
[January 24, 2026]

The cats are not skipping stones.

Color photograph of two cats creating patterns on a calm lake by skipping stones.
[January 24, 2026]

The cats are not skipping stones.

Color photograph of two cats creating patterns on a calm lake by skipping stones.
[January 24, 2026]

The cats are not skipping stones.

Out and About

Photograph of a cat sitting in a chair at a desk in an offie staring at a computer, with his left front paw on the keyboard and his right front paw on the mouse. *[June 22, 2025]*

"Offie" should have been "office."

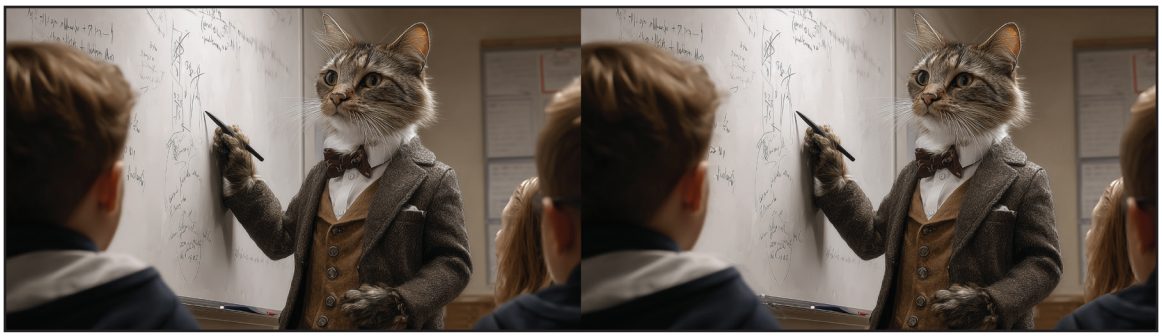

A cat in a mechanics uniform working on the engine of a BMW. *[June 22, 2025]*

Occupations

Photograph of a cat dressed in a three-piece suit, writing on a whiteboard in front of a class of students. *[June 22, 2025]*

This is a rare example of a single prompt producing four great images.

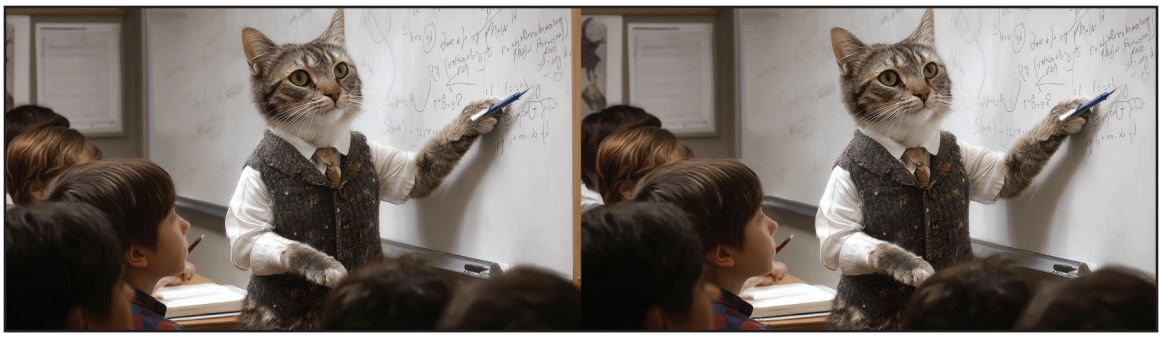

Photograph of a cat dressed in a three-piece suit, writing on a whiteboard in front of a class of students. *[June 22, 2025]*

Photograph of a cat dressed in a three-piece suit, writing on a whiteboard in front of a class of students. *[June 22, 2025]*

Occupations

Photograph of a cat dressed in a three-piece suit, writing on a whiteboard in front of a class of students. *[June 22, 2025]*

Photograph of a cat wearing a policeman's uniform standing on his rear legs in an intersection directing traffic. *[July 22, 2025]*

Color photograph of a cat standing on its hind legs, dressed as a Cardinal, vising the pope at the vatican. *[August 14, 2025]*

"vising" should have been "visiting."

at the Cat Show

Photograph of siamese cat looking elegant at cat show. *[July 28, 2025]*

Photograph of persian cat looking elegant at cat show. *[July 28, 2025]*

Color photograph of persian cat looking elegant at cat show. *[July 28, 2025]*

at the Cat Show

Color photograph of angora cat looking elegant at cat show. *[July 28, 2025]*

color photograph of Abyssinian cat looking elegant at cat show *[July 28, 2025]*

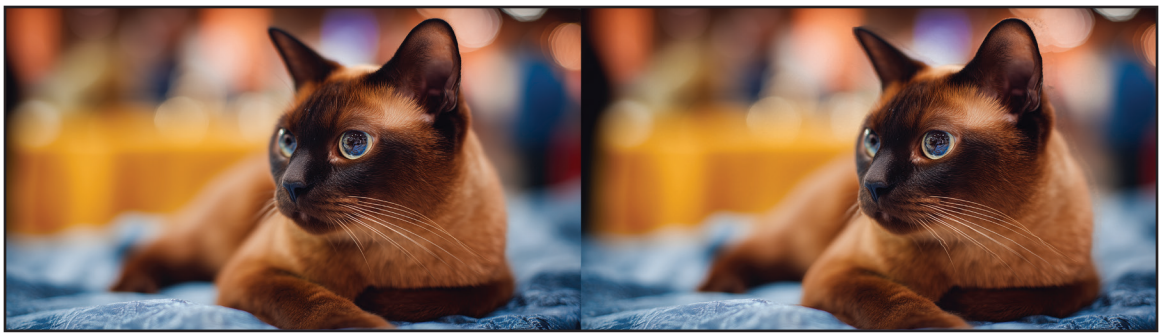

Color photograph of Aegean cat looking elegant at cat show. *[July 28, 2025]*

at the Cat Show

Color photograph of Bengal cat looking elegant at cat show. *[July 28, 2025]*

Color photograph of Burmese cat looking elegant at cat show. *[July 28, 2025]*

Color photograph of Egyptian Mau cat looking elegant at cat show. *[July 28, 2025]*

at the Cat Show

Color photograph of Maine Coon cat looking elegant at cat show. *[July 28, 2025]*

Color photograph of Manx cat looking elegant at cat show. *[July 28, 2025]*

Color photograph of Ocicat cat looking elegant at cat show. *[July 28, 2025]*

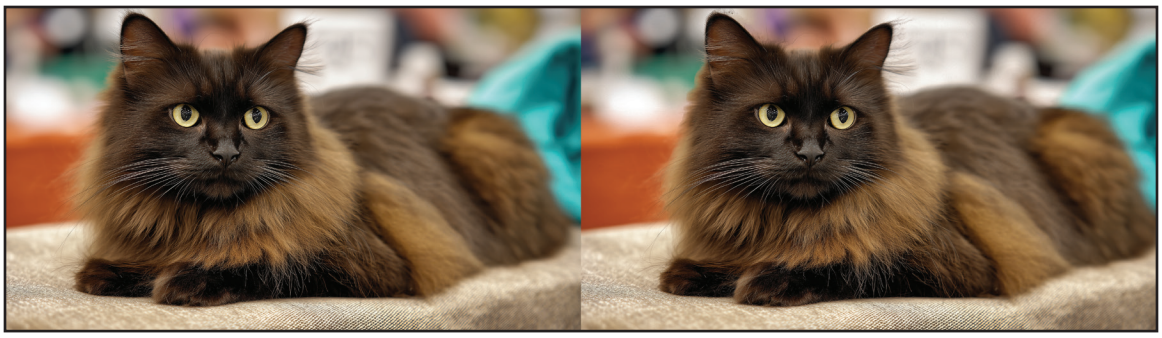

at the Cat Show

Color photograph of Savannah cat looking elegant at cat show. *[August 12, 2025]*

Color photograph of Serengeti cat looking elegant at cat show. *[August 12, 2025]*

Color photograph of York Chocolate cat looking elegant at cat show. *[August 12, 2025]*

at the Cat Show

Color photograph of a cat demonstrating agility at a cat show. *[October 9, 2025]*

Color photograph of Pandora cat looking elegant at cat show. *[August 12, 2025]*

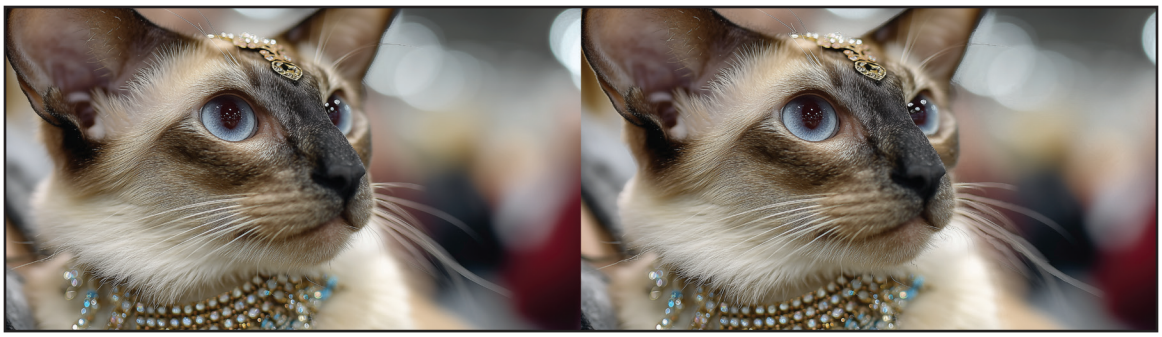

Pandora is a habitable moon orbiting the gas giant planet Polyphemus in the Movie Avatar, so this image is a hallucination.

Color photograph of Tatooine cat looking elegant at cat show. *[August 12, 2025]*

Tatooine is a fictional planet, home of Anakin and Luke Skywalker in Star Wars, so this image is a hallucination.

at the Cat Show

Color photograph of Arrakis cat looking elegant at cat show. *[August 12, 2025]*
Arrakis is a fictional planet in Frank Herbert's Dune, so this image is a hallucination.

Color photograph of Vulcan cat looking elegant at cat show. *[August 12, 2025]*
Vulcan is a fictional planet in Star Trek, so this image is a hallucination.

Color photograph of a cat standing on its hind legs, stylishly dressed, with a pencil and clipboard, judging other cats at a cat show. *[August 21, 2025]*

Touring the World

Color photograph of a cat standing on its hind legs, dressed as a tourist, standing outside of the Oregon Convention Center in Portland Oregon, holding a camera and taking photographs. The entire photograph is in focus. *[August 11, 2025]*

Color photograph of a cat standing on its hind legs, dressed as a tourist, exploring Bourbon Street in New Orleans, holding a camera and taking photographs. The entire photograph is in focus. *[August 11, 2025]*

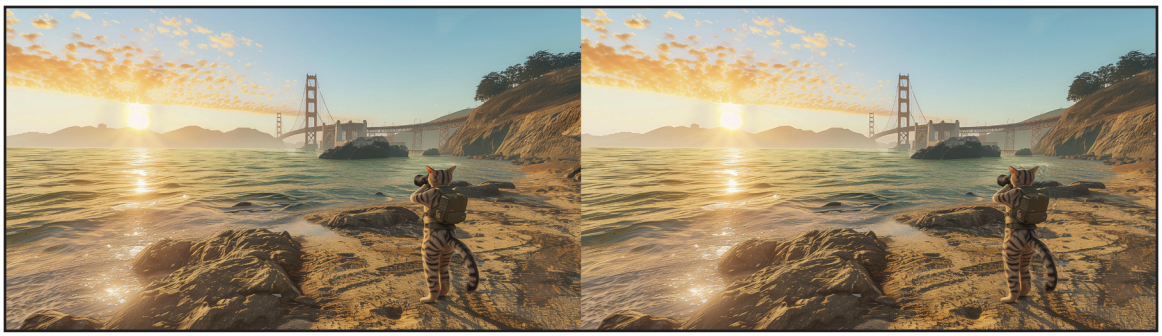

Color photograph of a cat standing on its hind legs, dressed as a tourist, exploring Bourbon Street in New Orleans, holding a camera and taking photographs. The entire photograph is in focus. *[August 11, 2025]*

Touring the World

Color photograph of a cat standing on its hind legs, dressed as a tourist, exploring the Golden Gate Bridge, holding a camera and taking photographs. The entire photograph is in focus. *[August 11, 2025]*

Foreground: Highly detailed cat standing on its hind legs, dressed as a tourist, standing on the shore of the Goden Gate Strait, holding a camera. Midground: Golden Gate Strait and the rocky shore. Background: The golden gate bridge. *[November 28, 2025]*

Refer to the Photorealistic Images section in the Introduction for the full prompt.

Color photograph of a cat standing on its hind legs, dressed as a tourist, exploring the Taj Mahal, holding a camera and taking photographs. The entire photograph is in focus. *[August 11, 2025]*

Touring the World

Color photograph of a cat standing on its hind legs, dressed as a tourist, exploring the Great Wall of China, holding a camera and taking photographs. The entire photograph is in focus. *[August 11, 2025]*

Foreground: Highly detailed cat standing on its hind legs, dressed as a tourist, holding a camera, exploring the Great Wall of China. Midground: The receding wall. Background: The wall in the distance and the landscape. *[November 28, 2025]*

Refer to the Photorealistic Images section in the Introduction for the full prompt.

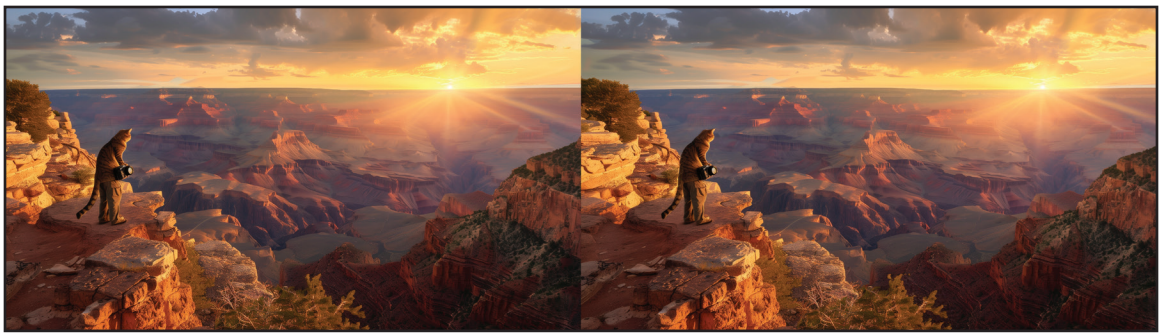

Color photograph of a cat standing on its hind legs, dressed as a tourist. The cat has its back towards us, and is facing the Great Pyramids of Egypt, holding a camera aimed at the Pyramids. The entire photograph is in focus. *[August 11, 2025]*

Touring the World

Color photograph of a cat standing on its hind legs, dressed as a tourist. The cat has its back towards us, and is facing the Grand Canyon, holding a camera aimed at the Grand Canyon. The entire photograph is in focus. *[August 11, 2025]*

Foreground: Highly detailed cat standing on its hind legs, dressed as a tourist, holding a camera. Midground: The edge of the Grand Canyon. Background: The Grand Canyon. *[November 28, 2025]*

Refer to the Photorealistic Images section in the Introduction for the full prompt.

Color photograph of a cat standing on its hind legs, dressed as a tourist. The cat has its back towards us, and is facing the Statue of Liberty, holding a camera aimed at the Statue of Liberty. The entire photograph is in focus. *[August 9, 2025]*

Touring the World

Color photograph of a cat standing on its hind legs, dressed as a tourist. The cat has its back towards us, and is facing the Eiffel Tower, holding a camera and taking a photograph of the Eiffel Tower in Paris. The lens of the camera is pointed toward the Eiffel Tower. The entire photograph is in focus. *[August 9, 2025]*

Color photograph of a cat standing on its hind legs, dressed as a tourist. The cat has its back towards us, and is facing the Coliseum in Rome, holding a camera and taking a photograph of the Coliseum. The entire photograph is in focus. *[August 9, 2025]*

Color photograph of a cat standing on its hind legs, dressed in jeans and a T-shirt, visiting the Washington Monument in Washington DC. *[August 22, 2025]*

Touring the World

Color photograph of a cat standing on its hind legs, dressed in jeans and a T-shirt, in a group of tourists visiting a lighthouse with the ocean in the background. *[August 22, 2025]*

Color photograph of a cat standing on its hind legs, dressed in jeans and a T-shirt, visiting the Space Needle in Seattle. *[August 22, 2025]*

Color photograph of a cat standing on its hind legs, dressed in jeans and a T-shirt, wearing a hat, riding a cable car filled with many people in San Francisco, waving at the people on the street. *[August 22, 2025]*

Touring the World

Color photograph of a cat expertly skiing on Mt. Hood. *[August 22, 2025]*

Color photograph of a cat standing on its hind legs, dressed in casual clothing, admiring the exhibits at the Monterey Bay Aquarium on the California Coast. *[August 22, 2025]*

Color photograph of a cat standing on its hind legs, dressed in casual clothing, browsing the Pike Place Market in Seattle. *[August 22, 2025]*

Calendar

Color photograph of a cat and a horse celebrating Chinese New Year. *[February 18, 2026]*

Color photograph of a cat and a horse celebrating Chinese New Year. *[February 18, 2026]*

Color photograph of a cat celebrating April Fool's Day. *[March 8, 2026]*

Calendar

Color photograph of a group of cats celebrating April Fool's Day. *[March 22, 2026]*

Color photograph of a human playing a trick on his cat for April Fool's Day. *[March 22, 2026]*

Color photograph of a cat playing a trick on his human for April Fool's Day. *[March 22, 2026]*

Calendar

Color photograph of a cat playing a trick on other cats for April Fool's Day. *[March 22, 2026]*

Color photograph of a black cat standing on his hind legs holding a broken mirror and walking under a ladder in defiance of Friday the 13th. *[October 1, 2026]*

Color photograph of a cat couple dressed as Bavarians dancing to celebrating Oktoberfest. *[November 1, 2026]*

AI Failures

Cat trying to catch a goldfish. *[November 8, 2025]*

What a wonderful image of a fish swimming through the air above the water.

Color photograph of cat sitting upright in a chair, with its front paws on a table, playing chess against an attractive woman in a brightly lit dining room. *[November 8, 2025]*

This cat has little interest in playing chess.

A balloon with a long string is floating in the living room. A cat is trying th grab the ballon by the string. *[November 8, 2025]*

The balloon is not exactly in the living room.

AI Failures

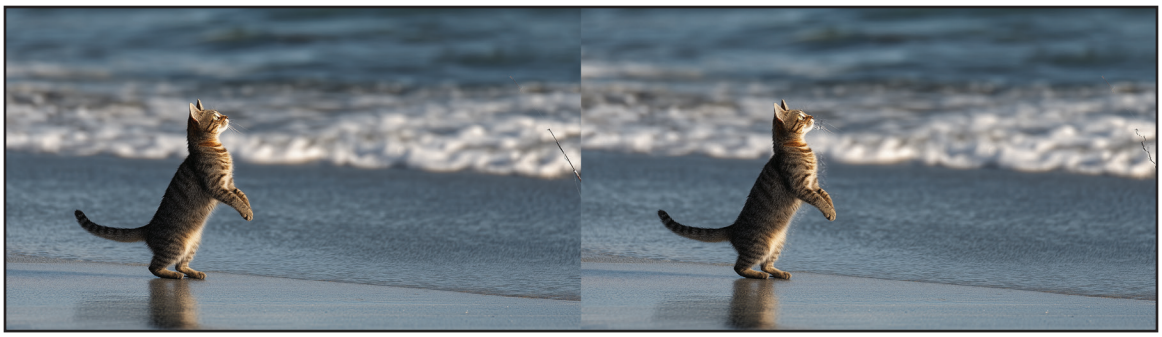

Two cats racing around the living room in a miniature red sports car. *[November 8, 2025]*

The cats are not quite in the miniature red sports car.

Photograph of a cat wearing casual attire, standing upright on its hind legs, looking through the eyepiece of a very large telescope in an observatory. *[November 8, 2025]*

The cat is not looking through the eyepiece of the telescope.

Color photograph of cat standing on its hind legs, walking along the beach with the ocean in the background, using a metal detector to search for buried treasure. *[November 8, 2025]*

What happened to the metal detector?

Colophon

This book was produced using Adobe InDesign on a Macintosh computer. The Raspberry Chocolate Chip Cookie recipe in the Introduction was produced using the Recipe Design Wizard Plug-In (https://recipedesignwizard.com) for Adobe InDesign. Type was set using Optima LT Pro. InDesign scripts (JavaScript) were used to ensure consistent formatting of the content and to automate the generation of the table of contents and the combined index and glossary.

With the exception of the photograph of the author on the inside front cover and the images in the introduction, all images were produced using Midjourney (https://www.midjourney.com), and they were converted to stereoscopic 3D using Owl3D (https://www.owl3d.com).

Front cover: Photograph of a cat wearing jeans and a casual shirt and stylish glasses, standing on its hind legs, holding a book in its front paws as it browses the books in a library. *(The cat is **not** wearing jeans.)*

Rear cover: Photograph of a clutter of cats.

https://www.midjourneycats.com
